In 2017, 53 confirmed cases of TB were reported in Franklin County. Of these confirmed cases, 46 (87%) occurred in persons who were foreign-born. Franklin County had the highest incidence of TB in the State of Ohio (case rate, 4.1/100,000) and accounted for 35% of Ohio cases.

2017 TB incidence in the US was 2.8/100,000 population. Ohio reported 150 TB cases in 2017 with a state wide incidence rate of 1.3/100,000. Cuyahoga County reported 27 TB cases with a case rate of 2.2/100,000, Hamilton County reported 18 cases with a case rate of 2.2/100,000. www.odh.ohio.gov/-/media/ODH/ASSETS/Files/health-statistics---disease---tb/2017/Detail-Report-2017-1.pdf?la=en

Under Ohio law, persons suspected of having TB and persons diagnosed with active TB disease should be reported to Columbus Public Health (CPH) Ben Franklin TB Program at 614-645-1823 or fax to 614-645-8669. <http://www.odh.ohio.gov/pdf/IDCM/tb.pdf> CPH serves as the local authority for all aspects of TB surveillance, medical management, and prevention and control activities. The Ben Franklin TB Program provides oversight and clinical case management for all active TB patients residing in Franklin County.

Except in rare situations, four-drug therapy should be initiated for all persons being treated for active TB. Testing and treatment guidelines can be found at <http://www.cdc.gov/tb/>.

Latent TB Infection (LTBI) is not reportable in Ohio. However, the Centers for Disease Control and Prevention recommends treatment for LTBI after TB disease is ruled out. LTBI treatment guidelines can be found at <http://www.cdc.gov/tb/>
